## PAT TESTING CHARGES

All electrical items should be tested for safety regularly to comply with health and safety legislation. The usual way that this is done is to PAT test each item. The acronym PAT means Portable Appliance Test, which is misleading, because anything that is plugged into the mains should be tested, even though some appliances are definitely not portable. Here are some suggestions of items you might have which need testing: Kettles, fridge, freezer, electrical tools, computers, leads and extensions, lights, machines, office machines, motors and so on. Please note that detachable leads are counted as a separate item as they are usually tested differently to the appliance to which they are attached.

We provide a comprehensive listing of all the items tested, and full details of any items that are failed. We provide standard pass or fail stickers.

*Some companies offering PAT tests do not carefully test each item, they may not even test them at all, but they will still charge you. We carry out the tests conscientiously using approved test machines, and you will not be disappointed with our service.*

### How our pricing structure works

The first 50 or fewer items are charged at	£2 per item
The next 50 items are charged at	£1.75 per item
The next 200 items are charged at	£1.30 per item
Any additional items are charged at	£1.00 per item

**These prices are subject to VAT**

### Faults

Minor faults found during the course of the inspection will be repaired as we find them and the appliance re-tested. All minor repairs are carried out free of charge, including the following:

- Replacement of faulty or damaged mains plug (BS1363)
- Replacement of damaged or incorrectly rated fuses
- Re-wiring of incorrect connections in the mains plug
- Repair to faulty cable grips in the mains plug
- Minor repairs requiring less than ten minutes labour
- Re-test following repair

Defective leads will be replaced with new, and more complex faults can be repaired in our workshops, but will be subject to additional charges.

### Area covered

As long as you have at least ten items for testing we go to all places in West Somerset, Taunton, Wellington, and other places (please enquire). If you have multiple sites, then the numbers can be aggregated for the best prices, so for example; a holiday home owner with ten properties, might have only five items for testing in each property, but would get the aggregated rate. If you have just a small number of items (less than ten) you can bring them to us and we will do them at the reduced price of £1.75 each. We make a small charge for attendance at sites over 25 miles distance.

### Access and Out of Hours Testing

Whilst we will try to minimize the disruption there is, unfortunately, no way the work can be carried out without some inconvenience. You might like to consider testing out of hours, say in the evening, or at the weekend. We will usually provide this at no additional charge.
